ViewCompanion Pro is the first plug-in for Adobe Reader to open DWF (Dyna-World Format) files. Dyna-World format is a graphical file format that was initially developed by Zenters, and is now used by many CAD Systems. It is based on a master page, which contains layers and symbols. It allows

drawing of several files at
the same time in a single
window. ViewCompanion
Pro supports more than 30
built-in extensions for
markups and symbols. Some
of the supported document
format: - DWF: DWF is a
file format for computer-
based visualization of
geographical information on
a map. It is a successor to the
Adobe PostScript format and

was introduced in 1996. The DWF format includes layers and symbols. It supports scaled maps, and allows printing and exporting to the PostScript format. - PLT (Platform Layers): PLT files are based on SWF, but can contain layers and symbols. The format is similar to DWG, although symbols can be used only in layers. - TIFF (Tagged Image File

Format): TIFF is a portable file format for storing raster images used in the graphics industry. TIFF images can be used in vector graphics programs such as CorelDraw and Illustrator. - HTML: HTML is a hypertext markup language, or HTML file. It is a text file that contains information in hypertext markup language tags. A web page can contain

no more than one HTML file. - GIF: GIF is a graphical file format originally designed for use on bitmapped displays such as used in early video telephony systems. It allows you to save and edit animations in graphics files. - TGA: TGA is an acronym for Tagged Graphics Arrays, and it is a file format for storing bitmap graphics on

the computer, similar to the BMP format. - CGM (Corel Graphical Manager): CGM is a file format for graphically-oriented documents that include bitmapped graphics. This format was introduced in 2001. - CALS: CALS is a file format for graphical data exchange. CALS was created in 1987 by Bell Labs to supplement the Symbol and

Versar formats. CALS files can contain up to 30 layers. - CGM (Corel Graphical Manager): CGM is a file format for graphically-oriented documents that include bitmapped graphics. This
